

LifeOS AI – Product Requirements Document (PRD)

Version

1.0

Status

Draft

Product Name

LifeOS AI

Tagline

Plan Better. Stay Consistent. Become Your Best Self.

1. Vision

LifeOS AI is an AI-powered productivity and personal growth platform designed to help people build discipline, consistency, and better daily habits.

Rather than being another to-do list application, LifeOS AI acts as a personal coach that helps users plan their day, stay accountable, maintain habits, track streaks, reflect on progress, and improve over time.

The long-term goal is to become an all-in-one personal operating system for life.

2. Problem Statement

Many people struggle with:

- Lack of daily planning
- Inconsistent habits
- Missed goals
- Poor time management
- Lack of motivation
- No accountability
- Too many disconnected apps
- Difficulty maintaining long-term consistency

Current solutions usually solve only one problem (tasks, calendar, or habits). Users often switch between multiple apps.

LifeOS AI combines planning, habits, AI coaching, journaling, reminders, analytics, and motivation into one platform.

3. Target Audience

Students

- Study planning
- Exam preparation
- Habit building
- Time management

Professionals

- Daily planning
- Work-life balance
- Goal tracking
- Learning plans

Entrepreneurs

- Business planning
- Meeting management
- Deep work scheduling
- Productivity insights

Fitness Enthusiasts

- Workout tracking
- Nutrition reminders
- Water intake
- Recovery tracking

Spiritual Users

- Prayer reminders
 - Meditation schedules
 - Gratitude journaling
 - Spiritual streaks
-

4. Core Objectives

Users should be able to:

- Plan every hour of their day

- Build healthy habits
 - Maintain long-term streaks
 - Receive AI-generated schedules
 - Stay accountable
 - Reflect every evening
 - View progress analytics
 - Build consistency over months and years
-

5. Core Features

Authentication

- Email & Password
 - Google Sign-In
 - Password Reset
 - JWT Authentication
 - Refresh Tokens
-

Dashboard

Display:

- Today's Schedule
 - Current Task
 - Upcoming Tasks
 - Daily Progress
 - Habit Completion
 - Current Streaks
 - Productivity Score
 - AI Coach Summary
 - Quick Actions
-

Daily Planner

Users can:

- Create schedules
 - Time block activities
 - Drag and drop tasks
 - Repeat schedules
 - Create templates
 - Plan by day, week, or month
-

Task Manager

Support:

- Priorities
 - Categories
 - Deadlines
 - Recurring tasks
 - Subtasks
 - Tags
 - Notes
-

Habit Tracker

Users can track:

- Exercise
- Meditation
- Reading
- Coding
- Water intake
- Sleep
- Custom habits

Include:

- Daily logs
 - Weekly reports
 - Monthly reports
 - Heatmaps
 - Completion percentages
-

Streak Engine

Track:

- Current streak
 - Longest streak
 - Missed days
 - Recovery streak
 - Milestones
-

AI Coach

Provide:

- Morning briefing
 - Evening review
 - Personalized reminders
 - Productivity suggestions
 - Habit recommendations
 - Schedule optimization
 - Daily affirmations
 - Weekly insights
-

Journal

Support:

- Morning intention
 - Evening reflection
 - Gratitude entries
 - Mood tracking
 - Free-form notes
-

Goals

Users can create:

- Personal goals
 - Career goals
 - Health goals
 - Financial goals
 - Learning goals
 - Spiritual goals
-

Calendar

Views:

- Daily
- Weekly
- Monthly

Features:

- Drag and drop
- Recurring events

- Color coding
 - Time blocking
-

Notifications

Support reminders for:

- Wake up
 - Water
 - Meals
 - Exercise
 - Prayer
 - Meditation
 - Meetings
 - Tasks
 - Sleep
-

Analytics

Display:

- Daily productivity
 - Weekly trends
 - Monthly summaries
 - Habit completion
 - Learning hours
 - Focus time
 - Goal progress
 - Streak history
-

AI Schedule Generator

Users enter:

- Wake-up time
- Sleep time
- Work hours
- Goals
- Exercise preferences
- Learning priorities

AI generates a balanced daily schedule automatically.

Gamification

Include:

- XP
 - Levels
 - Badges
 - Achievements
 - Daily challenges
 - Weekly challenges
 - Milestones
-

6. User Roles

Standard User

- Personal productivity
- Habit tracking
- AI coaching

Premium User

- Unlimited habits
- Unlimited AI requests
- Advanced analytics
- Schedule optimization
- Premium themes
- Export reports

Administrator

- User management
 - Analytics
 - Subscription management
 - System configuration
-

7. Technology Stack

Frontend

- Angular 20
- TypeScript
- Angular Material
- Tailwind CSS
- Angular Signals
- RxJS
- Capacitor

- PWA

Backend

- NestJS
- Prisma ORM
- PostgreSQL
- Redis
- BullMQ

AI

- Claude API
- OpenAI API

Infrastructure

- Docker
 - GitHub Actions
 - Cloudflare Pages
 - Railway
 - Neon PostgreSQL
 - Upstash Redis
-

8. Non-Functional Requirements

- Responsive design
 - Mobile-first
 - Dark and light themes
 - Offline support (future)
 - Secure authentication
 - Scalable architecture
 - High performance
 - Accessibility (WCAG)
 - Comprehensive testing
 - Production-ready code
-

9. MVP Scope

The first version should include:

- User authentication
- Dashboard
- Daily planner
- Task management
- Habit tracker

- Streak tracking
 - Calendar
 - Notifications
 - Daily journal
 - AI coaching
 - Analytics dashboard
 - User settings
-

10. Future Roadmap

Phase 2

- Team collaboration
- Shared schedules
- Family planning
- Smart widgets

Phase 3

- AI voice coach
- Wearable integrations
- Health tracking
- Smart calendar synchronization

Phase 4

- AI life assistant
 - Goal prediction
 - Personalized productivity insights
 - Marketplace for templates and routines
-

11. Success Metrics

- Daily Active Users (DAU)
 - Weekly Active Users (WAU)
 - Monthly Active Users (MAU)
 - Habit completion rate
 - Average streak length
 - User retention
 - Average session duration
 - AI engagement rate
 - Premium conversion rate
 - Customer satisfaction
-

12. Development Principles

- Build feature by feature.
 - Prioritize clean, maintainable code.
 - Follow SOLID principles.
 - Use feature-based architecture.
 - Keep components reusable.
 - Write comprehensive documentation.
 - Include unit and integration tests.
 - Design for scalability from the beginning.
-

13. Initial Development Milestones

1. Product architecture and system design
2. Project initialization
3. Authentication
4. User profile
5. Dashboard
6. Task management
7. Daily planner
8. Habit tracker
9. Streak engine
10. Calendar
11. Notifications
12. AI coach
13. Analytics
14. Settings
15. Mobile optimization
16. Deployment
17. Beta testing
18. Public launch
